# UNDERGROUND

"This is the story of a girl. The awareness of her diversity allows her to establish a relationship with the place that surrounds her. A distant place with which she can find an intimate harmony.

The concept of Counterculture well represents the context in which the girl lives. In fact, Counterculture is the set of cultural manifestations of ideological opposition (also called alternative culture), initially belonging to marginalized groups, generally young people with a marked non-conformist character and with a declared aversion not only to the manifestations of official culture but also to other aspects of the life and customs of society."

Photographer: ELENA MAGGIULLI
